Iliya Bluskov : Combinatorial systems (wheels) with guaranteed wins for pick-5 lotteries including Euromillions and the Mega lotteries before purchasing it in order to gage whether or not it would be worth my time, and all praised Combinatorial systems (wheels) with guaranteed wins for pick-5 lotteries including Euromillions and the Mega lotteries:

0 of 0 people found the following review helpful. GREAT PRODUCT JUST AS EXPECTED..By JAYCIAGREAT  
PRODUCT JUST AS EXPECTED..11 of 12 people found the following review helpful. great bookBy Edward L  
YarchenkoAn excellent helper for those of us who like to play the lottery,I have used this system on three draws so  
far playing twenty lines with each draw and I have had two 3wins[I play fantasy 5] and over twenty free plays!!! the  
best results Ive had in twenty years of playing just after reading/using Ilya's logic and formula's,Thank You Ilya..8 of 9  
people found the following review helpful. Great book, "good things happenBy kenSystem #72, 19 numbers with 26  
combinations was the won that did the trick. P 212. 5 stars for a 5 number Fantasy 5 win! Patience, self discipline, and  
consistency! A little bit of luck helps too. Great book, "good things happen."

This book is Dr. Bluskov's newest installment on entertaining lotto strategies, with focus on PICK-5 lotteries. The  
book covers any pick-5 lottery in the world (a lottery where the main draw has 5 numbers), for example, lotteries such  
as 5/25, 5/35, 5/39, 5/47, etc., including Mega lotteries such as Powerball, Mega Millions, EuroMillions, Thunderball,  
etc. It is a book for players or groups of players, who want to play more than five numbers and more tickets in a well-  
organized, balanced, and entertaining way. The author has used advanced methods of combinatorics and optimization  
to design the most economical lottery system (wheel) for any given guarantee. Each of the explicitly given systems in  
his book comes with a complete table of possible wins. The lottery player will find systems with double and multiple  
guarantees, excellent navigational tools and presentation. This book once again defeats the common belief that the  
lottery is a boring game and that the only excitement comes from watching the draw and matching some of the  
winning numbers. It shows that choosing the right way of playing your numbers, assessing the possible wins and  
filling the tickets can be as entertaining as a trip to Las Vegas! Players who are interested in lotto systems for PICK-6  
lotteries can check Dr. Bluskov's pick-6 book titled Combinatorial Lottery Systems (Wheels) with Guaranteed Wins  
(also at Amazon).

In his new book, Professor Bluskov presents a collection of exquisite pick-5 lotto systems to the attention of lotto  
players and syndicates from around the world. A total of 126 current world record least expensive systems for a broad  
range of guarantees are presented. Professor Bluskov's follows the tradition from his pick-6 book and offers the newest  
and best on lotto systems (wheels), this time for pick-5 lotteries, including Mega Lotteries such as Powerball, Mega  
Millions, EuroMillions and Thunderball. It is a book of interest to every lottery player or a group of players who wish  
to play their numbers in an organized and balanced way. Lottery systems (wheels) guarantee wins in the same way a  
single ticket does while allowing playing with many numbers (7,8,9,10,11,12,13,14,... etc.) For instance, a single ticket  
guarantees a 4-win if four of the player's numbers are drawn. A lottery system is a well-organized set of tickets, giving  
the same guarantee, while allowing the players to use as many numbers as they wish. For example, system #5 from the  
book guarantees a 4-win whenever four of the player's 10 numbers are drawn; system #6 guarantees a 4-win whenever  
four of the player's 11 numbers are drawn, etc. Systems with many other guarantees are presented in this excellent  
strategy book. Each system has been constructed by Dr. Bluskov's new techniques of combinatorial and computer  
optimization, and, therefore, gives the most economical way of playing for a certain guaranteed win. All of these  
systems are world records in terms of performance (achieving certain guarantee in the minimum possible number of  
tickets). The book is quite unique; it is the only one on the subject, written by a mathematician and a lottery expert and  
we believe it is the best one in existence. The book offers a huge number of improvements in the area of classical  
lottery systems. Many of its features are completely new for the genre, for example, systems with double and multiple  
guarantees and tables of possible wins. Other unique features include the presentation and organization of the material:  
Each system appears as a separate article, including a table of all possible wins comments on various characteristics of  
the system, such as minimality, balance and density; and the system itself. The book provides the tools to make  
playing the lottery as entertaining as playing a table game and gives the player strategies to attack the jackpot in a  
balanced and well-organized way. No mathematical knowledge is needed to either play or understand the lottery  
systems, which makes the book accessible to virtually every lottery player or a group of players. --From the  
publisherAbout the AuthorThe author has worked as a freelance writer for a number of lottery publications in Europe  
and North America, and has spent many years in research in Combinatorics, a branch of Mathematics, which, among  
other things, deals with combinatorial lottery systems (also called coverings in Combinatorics). He holds several  
academic degrees, including Ph.D. in Mathematics, and works as a university professor. Dr. Bluskov has written over  
20 research papers related to lotteries and over 200 publications on lottery systems. The objects presented in his book  
originate from the most recent research in the area, and are based on his expert knowledge of the subject.
