**Julian Cope : Cependium: An Expedition into the Rock 'n' Roll Underworld** before purchasing it in order to gage whether or not it would be worth my time, and all praised Cependium: An Expedition into the Rock 'n' Roll Underworld:

Eschewing the usual criteria of chart success or acknowledged influence, the Cependium a collection of album

reviews and themed track samplers takes energy, originality and heaviness as its bearings. The result is a feast of obscure and neglected masterworks that together form a surprising but entirely credible new tradition. Krautrock, motorik and post-punk, stoner and doom metal, occasionally even jazz, spoken word and hair metal: they are all represented in a wholly persuasive sequence. Cope is the perfect guide to this novel terrain: impeccably informed, passionate, insightful and deeply funny. Cope is his re-imagining of a useful canon of popular music, and it is set to become required reading.
