However, the last book had two copies of the DVD and no CD which is the only one we really use. 4 of 4 people found the following review helpful. Good for my 5 year By nat c Simple learning steps. Good for my 5 year old 6 of 7 people found the following review helpful. Piano Teachers New Favorite Beginner Curriculum!! LOVE IT!!! By Kindle Customer Highly - Highly recommend!!!! I'm a piano teacher. I teach 4 years old and up. Until I found this book, my students were instinctively learning the finger numbers instead of the pitch notations. With this series the students learn the pitch notations right away without the finger number!! There are NO finger numbers!! Each lesson introduces one pitch notation starting with middle C. This is AWESOME!! I recommend this for any beginner!!! Even the older student because It comes with a CD that the student can play along with - this way the older students have a challenge. I'm hoping that starts carrying these in their warehouse so we can all get it with our Prime.

Ideal Starting Point for the Young Beginner. A carefully graded lesson by lesson method for the younger student, using very easy arrangements of over 20 favorite children's songs. Introduces five notes on each hand using the white notes only. Beautifully illustrated throughout in full color.
