This is the only book that mathematically shows craps players how to profit from the regular and irregular cycles and

patterns of dice as part of their winning strategies. Hot and cold streaks form the basis of every serious craps player's belief and often their strategy. This is the only book that mathematically shows craps players how to take advantage of the cycles and patterns of dice and walk away with profit. Readers also learn about all the bets, odds, key mistakes made by players and how to stop making them, the actual probabilities, how they are calculated, and how reality can differ from theory and how the game should best be approached to win money at craps.
