This cryptograms puzzle book with 3 Hint Sections will entertain and challenge your brain with 300 cryptoquote puzzles for you to decipher notable quotes from well-known people of modern times. Spacing has been expanded between letters as well as between lines to enhance your decoding experience: Easy-to-read 14-point font with extra spacing between letters. Double-spaced lines within each puzzle. Divider line between puzzles. Three cryptogram puzzles per 7x10-inch page allows extra spacing around puzzles. Only simple substitution ciphers are used, meaning each letter of any coded message cryptogram has been encrypted with another letter. There are 3 Hints per cryptoquote puzzle divided on separate pages in front so you won't see but one letter clue at a time. If you get stuck, try using just one at a time for that may be all you need to start cracking the cryptogram. Solutions for the cryptograms are in two different sections in the back: a section for Odd-Numbered Puzzles, a section for Even-Numbered Puzzles. This way the next sequential numbered puzzle would not be seen accidentally to spoil the decoding fun.
