**Nick Snels : Daily Sudoku Puzzle Calendar 2017 (Daily Puzzle Calendar 2017)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Daily Sudoku Puzzle Calendar 2017 (Daily Puzzle Calendar 2017):

0 of 0 people found the following review helpful. the puzzles were extremely easy, definitely not "very difficult"By Norbert LeserAs previous reviewers already said, the solutions page is wrong. However, it'll probably rarely be needed anyways. Thus far, except for Jan 7, the puzzles were extremely easy, definitely not "very difficult", as advertised.

Particularly disappointing because I bought this book just because of the supposed difficulty level. Unfortunately, all other calendar-type sudoku's that I know of contain the annoying range from easy to (sort of) difficult. Hopefully someone will come up with a decent sudoku calendar for next year. Disappointing start of an otherwise not too promising year ;-)

By Rafn Markelius

Someone purchased this calendar as a gift for me, and I hate having to sully their grand intentions with an ignominious review, but The fact that the "answers" have nothing to do with the puzzles is the least of the offenses. Actually, the "answers" published in the back reveal something worse: these puzzles were clearly generated from a basic computer algorithm (most of them start with 147/592/386 in their left column) from which selective numbers are inexpertly removed. The result is a combination of virtually unsolvable puzzles, ridiculously easy ones, and a number with multiple solutions (since the algorithm didn't seem to stipulate that an XY in one row can't have a YX in an aligned row, for example). It's a shame, since the format seems decent, though I personally prefer the tear-off page-a-day calendars.

By Timothy J. Kobetz

I received this book as a gift. There must be a misprint because the solutions are absolutely wrong. They give the same solution for nearly all the puzzles, even having the pre-printed numbers in the incorrect spaces. To date, only January 5 correlates with the correct solution.
