**John G. Hanhardt, Paul Arthur : Pat O'Neill: Views From Lookout Mountain** before purchasing it in order to gage whether or not it would be worth my time, and all praised Pat O'Neill: Views From Lookout Mountain:

Views from Lookout Mountain is the first book to survey the films and visual art works of one of Los Angeles' most exceptional artists and film-makers. It locates Pat O'Neill's masterful films in a visual arts context, where the works can be most fully appreciated as powerful projections of temporal painting, aural composition and visual poetry. Views from Lookout Mountain features color film stills, reproductions of O'Neill's visual art works, documentary photographs, and a commissioned collaborative project between Pat O'Neill and Michael Worthington.
