John Cones : Patterns of Bias in Hollywood Movies before purchasing it in order to gage whether or not it would be worth my time, and all praised Patterns of Bias in Hollywood Movies:

0 of 0 people found the following review helpful. Hollywood's Petty BigotryBy Puerto OrdazIf you were ever thinking that Hollywood has not heard about any wars since WW2, thinks most villains have a German accent, or think that the only "good" war was WW2, you were not hallucinating.

Many groups within our multi-cultural society have complained about negative and stereotypical portrayals of their own group members in the movies. Yet, as an expert on the U.S. film industry points out, such complaints have had little impact on these consistent patterns of bias in films. John Cones shows that this lack of diversity at the top in Hollywood results in long-standing patterns of bias in motion picture content, and suggests that the solution could lie in increasing diversity at the highest levels in the U.S. film industry. This work grew out of the observed frustration of film industry critics who have pointed out examples of bias and stereotyping in specific Hollywood movies over the years only to be rebuffed by the simplistic studio arguments that such films reflect the real world and that moviegoers vote with their pocket books. It can be shown that there is a consistent pattern to the choices Hollywood studio executives make with respect to the movies produced and released and the specific content of those movies, and it becomes obvious that Hollywood is selectively portraying reality. Moviegoers only have limited options among all of the possibilities that could be portrayed on the silver screen. This book differs from other studies touching on bias in motion pictures. Most such books focus on the treatment of a single ethnic, religious, cultural, racial or other readily identifiable interest group, but this study attempts to provide an overview and to identify patterns over time. When the patterns of bias in motion picture content are sufficiently demonstrated and documented, it becomes easier to identify the source of the bias and to explain why such bias exists. The problem appears to be that most of the people who have green-light authority in the Hollywood-based U.S. film industry share a common ethnic/religious/cultural background. Thus, the stories of all other ethnic, religious and/or cultural groups in the U.S. (whose members seldom achieve positions of power in Hollywood) are being filtered through the cultural sensibilities of a single group.

About the Author John W. Cones is a practicing securities/entertainment attorney, an active lecturer on film finance and related topics, and author of seven other books about the film industry. He was based in Los Angeles for 23 years and is now in Austin.
