**Lorna Hardwick : Reception Studies (New Surveys in the Classics)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Reception Studies (New Surveys in the Classics):

The texts, images and events of the ancient world have been used both as sources of authority and exploitation in

politics, culture and society and as icons of resistance and contest. How classical culture is transplanted into new contexts, how texts are translated and performed and how Greek and Roman values are perceived and used continues to be a force in current debates. The main concepts and explanatory frameworks used in the field are introduced through chapters on reception within antiquity and case studies of more recent receptions from Africa, the Caribbean, Europe and the USA. The book will be of use to all those interested in the relationship between the arts, culture and society as well as to students and teachers of classical subjects and of literature, drama, film and comparative cultural studies.

"This thoughtful book...has much to offer in the way of case studies of reception, stimulating further thinking about them. Hardwick is an enthusiastic advocate of the continuing transformative reception of Greek and Roman texts."--  
International Journal of the Classical Tradition  
About the Author Lorna Hardwick, Professor of Classical Studies, The Open University.
