For 200 years, Beethoven's symphonies have been at the core of the classical repertoire, and they remain among the most important works of art in any medium. They embody the composer's innovative notion of the symphonic ideal. Although classical in structure, the symphonies possess a psychological element that makes them the quintessence of Romanticism. These elegant four-hand versions of Beethoven's masterpieces have long been favorites of duet performers. This volume brings his final four symphonies to the hands of pianists in faithful, satisfying arrangements suitable for performance or study.
