Did the best they could - easy piano for songs that don't sound great as a piano solo By JPeacock A few songs sound great but many songs in tangled have a lot of speaking parts instead of singing - the "flower gleam and glow" song is great and easy. Also, "now that I've found you" is great. The others are questionable. I think the problem is that these songs just aren't meant to be piano solos. 1 of 1 people found the following review helpful. Music for fun! By Customer My intermediate level piano players are having a blast with this music. It's not overly simple sounding but they are able to learn these fun pieces quickly! 0 of 0 people found the following review helpful. great for children By DoubleT Perfect for my younger students. Only a few songs though.

(Easy Piano Songbook). Disney's Tangled is a story of adventure, heart, humor and hair lots of hair. The soundtrack matches the fun adventure of the film, with original songs and score from legendary, 8-time Academy Award -winning composer Alan Menken and Tony and Grammy nominee Glenn Slater. Features Mandy Moore singing on several of the songs, and Grace Potter performing her hit "Something That I Want." Also includes easy arrangements of: Healing Incantation \* I See the Light \* I've Got a Dream \* Mother Knows Best \* and When Will My Life Begin, plus a stunning section of full-color art!
