A great exercise for brain, being fun at the same timeBy KalSharA very nicely made product - the wooden pieces are very smooth without any splinters or sharp edges. The puzzles are awesome - during my pass-time, I try making these - some take a few minutes to solve, but some could take a few hours. It is so interesting that my daughter was trying to put together some when she was 4. You have 501, not 500 puzzles, because you have to arrange them to form a square to put them back in the packing pouch. Some of the puzzles are un-imaginable - I could not believe that you could make many of the shapes with the wooden pieces provided. The author/creator should be honored for his creativity.I recommend this to anyone from 4 to 100+ years old - You are never too young to start training your brain, and never too old to stop. I would have bought it even if it cost twice of what it costs now.0 of 0 people found the following review helpful. Tangram Puzzles: 500 Tricky Shapes--found at .comBy TrudiGertI am really enjoying the tangrams puzzles in the book. They are not easy, but the challenge is good. My 3 year-old great granddaughter plays with them. She can put them in the box correctly.

Otherwise, she looks at the answers and tries to imitate them. My 9 and 12 year-old grandchildren and I really enjoy them. I remember my father's set that came from the Omaha World Herald. It was a tiny ebony set that was just the right size for laying on the newspaper puzzles. They called it Pythagoras. I always loved them and was so thankful to find wooden sets. Years ago all I could find was a plastic set. I was so happy to find solid wooden sets, I got this and another set. 0 of 0 people found the following review helpful. NiceBy CatA good, old, puzzle that has history and still seems fresh. I gave used these to help treat kids with visual-spatial problems. At home we have more than one set so we can race to the finish. All ages can play together, and a person can work to solve the puzzles alone. The provided challenges are good, although I don't love the presentation. The puzzle pieces are nice and smooth.
