**Giulio Zambon : Target Countdown Puzzles** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Target Countdown Puzzles:

Give your brain the workout it needs. A deceptively simple and intelligently created set of puzzles that make you numerically smarter, more adept at handling multiple calculations in your head and also faster at mental math. A few minutes of these puzzles will provide a much needed exercise to your grey cells and boost your brain power. Three levels of difficulty. Perfect for all ages. With full solutions at the end of the book.
