Good things come in small packages!!By StarmanHaving read everybody from Sartin,Brohamer,Pizzolla (The Pirco boys et.all) as well as Quirin to Quinn, I'll tell you this is hands down, the most usefull book of all. The above authors are some of the best, not to leave out Mitchell and Beyer. I can only say that for putting it all together in one place, "Ten Steps to Winning" is tops! It's reference to Ray Taulbot's Pace Calculator for pace analysis is right on the money. I know, I've won using it. Buy this book, study this book, and I'll see you on the short line. PS The Taulbot Calculator works best when track variants are figured in.0 of 0 people found the following review helpful. Fun to read bookBy Jeffrey GoldsteinFun to read book, a bit overpriced, but enjoyed author's opinionated views. Insights gained through considering principles contained within. Example chapter particularly interesting. Overall, a worthwhile work.1 of 2 people found the following review helpful. Ten Step to WinningBy Gary WileyThe material in this book works well for sprints and routes, at least on paper. I haven't any complaints about the book. The shipping was fast by the seller and the quality of the book was like new.
